## SENIOR MANAGER - CLIENT CONSULTANT | SOLUTION ARCHITECT

Client-focused, strategic Solution Architect and Product Partner with over 20 years of experience designing and executing high-throughput, secure distributed systems and digital applications. Expert at bridging technology and product strategy, acting as a trusted advisor to clients while wearing the Product Manager hat to capture complex business requirements and translate them into scalable technical designs. Proven track record leading client discovery sessions, architecting end-to-end transaction flows, and managing cross-functional stakeholder alignment in fast-paced Agile environments to drive tangible business value.

## CORE CLIENT CONSULTING & SOLUTION ARCHITECTURE

- **Client Consulting & Solution Design:** Proven capability leading deep discovery sessions to assess client-state architecture, define future-state visions, and author core implementation artifacts including integration diagrams, solution designs, and validation test plans.
- **Product Management & Requirements Gathering:** Skilled at translating complex business needs into structured functional requirements, user stories, use cases, success metrics, and clear acceptance criteria while managing backlogs and roadmaps.
- **End-to-End Payments & Digital Ecosystems:** Comprehensive understanding of secure transactional systems, distributed ledger capabilities, and transaction lifecycles, including infrastructure data governance, fraud management, and strict compliance frameworks.
- **Cross-Functional Team Leadership:** Adept at organizing and aligning cross-functional internal and client teams across Product, Engineering, and Operations to maintain rigorous quality control throughout the delivery lifecycle from design to go-live.
- **Agile Operations & Stakeholder Management:** Expert in operating within fast-paced Agile environments, utilizing Jira Management, supervising SDLC mechanics, prioritizing backlogs based on client value, and managing complex stakeholder relationships.

## PROFESSIONAL EXPERIENCE

### 7-Eleven

Frisco/Dallas, TX

Senior Engineering Manager / Solution Architect - 7Now Delivery Platform

2024 – 2026

- **Client Solution Design & Architecture:** Architected high-impact end-to-end implementation roadmaps and integration strategies for a digital platform serving 250 million users, successfully moving technical systems from initial discovery to high-scale production.
- **Requirements Engineering & Product Partnering:** Wore the Product Manager hat to bridge engineering and business capabilities, translating stakeholder needs into clean technical documentation and functional requirements, which accelerated time-to-market by 25%.
- **Cross-Functional Alignment:** Led solution implementation workshops collaborating with Product, Engineering, Design, and Executive teams to review system designs, integrations, configurations, and post-launch verification processes.
- **Governance & Best Practices:** Formulated internal developer playbooks and architecture diagrams that established robust delivery frameworks, reducing post-launch anomalies by 30% and ensuring high-quality client outcomes.

### CVS Health

Remote

Director / Engineering Manager - Digital Applications & Regulated Infrastructure

2014 – 2023

- **Trusted Technical Advisory:** Served as a trusted technical advisor to internal business units and external client partners, mapping existing system architectures and defining scalable future-state architectures for secure digital health applications.
- **End-to-End Transaction Ecosystems:** Supervised transactional and data frameworks operating within highly regulated environments, ensuring complete risk mitigation, data governance, and strict alignment with industry data security standards.
- **Agile Delivery & Jira Management:** Guided multi-disciplinary cross-functional squads consisting of 12–18 engineers and product owners using Agile delivery mechanics and proactive backlog grooming, improving sprint velocity by 20%.
- **Stakeholder Prioritization & Use Case Definition:** Partnered directly with product and operations leaders to prioritize system features based on client value, business feasibility, measurable impact, and defined success criteria.

### Enterprise Consultant

Various

Technical Lead / Senior Software Engineer

2005 – 2014

Client Portfolio: American Express, AT&T, Verizon, JPMC, Universal American, Alindus

- **Architecture Review & Analytical Assessment:** Conducted detailed explorations into high-throughput transaction flows, tokenization protocols, and secure data pipelines for financial services and telecommunications clients.
- **Integration Diagrams & Artifact Production:** Produced core implementation artifacts including data flow diagrams, integration specifications, and detailed technical reports to guide business stakeholders through complex software integrations.
- **Agile Project Execution:** Tracked project milestones, aligned engineering outputs with business requirements, and maintained strict attention to detail in fast-paced corporate environments.

## EDUCATION, CERTIFICATIONS & QUALIFICATIONS

- **AWS Certified Solutions Architect – Professional** | Credential Verification Link
- **Applied Agentic AI for Organizational Transformation** | MIT Professional Education (2026)
- **Bachelor of Technology (B.Tech) in Computer Science & Engineering** | Kakatiya University, India
- **Technical & Consulting Toolkit:** Solution Design, Technical Integration Diagrams, Client Consulting, Business Requirements Gathering, Use Case Definition, Test Plans, Agile/Scrum, Jira Management, Roadmapping, Backlog Grooming, SDLC, AWS, Cloud Native Architecture.
